Molecular Metabolism is committed to serving as a platform reporting breakthrough discoveries in energy homeostasis and in the etiology, development, treatment and associated health consequences of metabolic disorders, such as obesity, diabetes, cardiovascular disease and cancer.

### **Molecular Metabolism - Journal - Elsevier**

Medical genetics is the branch of medicine that involves the diagnosis and management of hereditary disorders. Medical genetics differs from human genetics in that human genetics is a field of scientific research that may or may not apply to medicine, while medical genetics refers to the application of genetics to medical care.

### **Medical genetics - Wikipedia**

In this issue of Molecular Metabolism, Coskun and co-authors report the discovery and biological assessment of a novel peptide of sustained duration of action that displays agonism at the glucose-dependent insulinotropic polypeptide (GIP) and glucagon-like peptide 1 (GLP-1) receptors.

Titin / ˈtɪtᵻn /, also known as connectin, is a protein that, in humans, is encoded by the TTN gene. Titin is a giant protein, greater than 1 Åµm in length, that functions as a molecular spring which is responsible for the passive elasticity of muscle.

### **Titin - Wikipedia**

New Articles. Articles below are published ahead of final publication in an issue. Please cite articles using the format: authors, (year), title, journal, DOI.

Background. Intravenous (IV) arginine has been reported to ameliorate acute metabolic stroke symptoms in adult patients with Mitochondrial Encephalopathy with Lactic Acidosis and Stroke-like Episodes (MELAS) syndrome, where its therapeutic benefit is postulated to result from arginine acting as a nitric oxide donor to reverse vasospasm.

### **8-year retrospective analysis of intravenous arginine**

Integrative Molecular Medicine is a peer-reviewed, online open access journal dedicated to a new research discipline at the interface between clinical research and basic biology.

### **Quantitative determination of muscle fiber diameter**

ABSTRACT. In recent years there has been a great progress in molecular biology techniques, which has facilitated the researches on influence of genetics on human performance.

### **Genetics and sport performance: current challenges and**

With the development of molecular marker technology in the 1980s, the fate of plant breeding has changed. Different types of molecular markers have been developed and advancement in sequencing technologies has geared crop improvement. To explore the knowledge about molecular markers, several reviews

### **DNA molecular markers in plant breeding: current status**

Note: The cellular phenotype of A-T represents genome instability, deficient DNA damage response (DDR), and elevated oxidative stress, in addition to a premature senescence component (Shiloh Y et al., 1982).
