Research Summary. My current research is at the intersection of communication theory, signal processing, and information theory. A primary research thrust is the advancement of MIMO (multiple-input multiple-output) communication technology including space-time coding, efficient receiver algorithms, channel quantization, synchronization ...

Simplex This software is intended to replace the hardware logic of repeaters. With SIMPLEX, repeaters may be quickly implemented with a few connections between the computer sound card and the audio receiver output and microphone transmitter input. It handles simplex repeater, duplex repeater, transponder and mixed mode.
