multithreading for visual effects pdf
In computer science, a thread of execution is the smallest sequence of programmed instructions that can be managed independently by a scheduler, which is typically a part of the operating system. The implementation of threads and processes differs between operating systems, but in most cases a thread is a component of a process.

Thread (computing) - Wikipedia
Note: 2008 and older issues are only available as .chm files. On most versions of windows you must first save these files to your local machine, and then unblock the file in order to read it.

MSDN Magazine Issues
Rendering or image synthesis is the automatic process of generating a photorealistic or non-photorealistic image from a 2D or 3D model (or models in what collectively could be called a scene file) by means of computer programs.

Rendering (computer graphics) - Wikipedia
PLINQ offers the richest functionality: it automates all the steps of parallelization â€" including partitioning the work into tasks, executing those tasks on threads, and collating the results into a single output sequence.
